Office Action Summary	Application No. 10/500,956	Applicant(s) TRECATE, ROBERTO	
	Examiner Harry B. Tanner	Art Unit 3744	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim 8 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim must refer to the parent claims in the alternative form (i.e. claim 8 depends from claim 7 and any one of claims 1-6). See MPEP § 608.01(n). Accordingly, the claim 8 has not been further treated on the merits.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Sulfstede et al.. Sulfstede discloses a system and method of modulating conditioner power and the air flow rate in response to temperature of the conditioned area (see Figure 1 and Figure 4).

Claims 1-2, 5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Matsuda et al. Matsuda discloses a system and method of regulating conditioner power and the air flow rate in discrete steps in response to temperature of the conditioned area (see Figure 5).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sulfstede et al in view of Matsuda et al. Sulfstede is applied as in the rejection of claim

1 above. Matsuda teaches the use of discrete steps for controlling the speed the compressor of an air conditioner and the use of discrete steps for controlling the speed of the fan of an air conditioner. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the system of Sulfstede such that it included the use of discrete steps in controlling the speed the compressor or the speed of the fan in view of the teachings of Matsuda.
